AIB International Announces Baking Process Kill Step Calculator Webinar

For Immediate Release
August 21, 2018

AIB International Hosts Baking Process Kill Step Calculator: Application & Interpretation Webinar

Manhattan, Kansas – AIB International announced today it will host a free webinar, Baking Process Kill Step Calculator: Application & Interpretation. Targeted to facilities seeking expert advice on how to interpret and disseminate the calculator results, the webinar will include a live Q&A session with Dr. Kantha Channaiah, the expert behind the calculators.

New regulatory requirements call for each FDA-registered food manufacturing facility to scientifically demonstrate and document evidence of the kill step in baked goods production, as a result, AIB International entered a needs evaluation with partners from American Bakers Association and its Food Technical and Regulatory Affairs Committee, and researchers at Kansas State University and the University of Georgia. The results generated the development of Baking Process Kill Step Calculators for various baked products.

The webinar, presented by Channaiah, will provide a clear overview of the components that comprise the Baking Process Kill Step Calculator as well as real-world application. During the webinar, attendees will learn how to interpret the Baking Process Validation Report, what advantages the Baking Process Kill Step Calculators offer, limitations to the calculators, and how to explain to the FDA investigator why your calculator results validate the baking process as a kill step.

The webinar will kickoff on Thursday, Sept. 6 at 11 a.m. CDT and conclude with a live Q&A.
